SUMMARY

Backend engineer with 4+ years of experience building Python services and REST APIs for e-commerce and logistics products. Comfortable owning features end to end, from schema design to production monitoring.

EXPERIENCE

Software Engineer II — ParcelPoint Logistics
Jan 2024 – Present

- Built a shipment-tracking platform in Django and PostgreSQL serving 1.2M requests/day with 99.95% uptime.
- Reduced p95 API latency from 420 ms to 140 ms by adding Redis caching and rewriting N+1 ORM queries.
- Designed an event pipeline on RabbitMQ and Celery that processes 300K carrier updates per hour.
- Migrated 14 services to Docker containers on AWS (ECS, S3, RDS), cutting infrastructure cost by 22%.
- Set up GitHub Actions pipelines with automated tests, raising unit-test coverage from 48% to 85%.
- Mentored 3 junior engineers and led weekly code reviews.

Software Engineer — CartNest
Aug 2022 – Dec 2023

- Developed checkout and inventory microservices with Flask and MySQL for 40K daily active users.
- Was responsible for the payments integration with Stripe; shipped refunds and partial captures.
- Wrote pytest suites and contract tests that caught 30+ regressions before release.
- Collaborated with product and design in two-week Scrum sprints.

PROJECTS

Job Radar — side project

- Built an async scraper in Python with aiohttp that indexes 50K job posts per week into Elasticsearch.

EDUCATION

B.Tech in Computer Science — State Technical University, 2018 – 2022

SKILLS

Languages: Python, SQL, JavaScript
Frameworks: Django, Flask, Celery
Data & infra: PostgreSQL, MySQL, Redis, RabbitMQ, Elasticsearch, Docker, AWS, Linux, Git
Practices: REST APIs, unit testing, Agile/Scrum, code review
